## Test poll: dogs or cats?

# Our objectives:

- ❑ Describe different aspects of citizen science
- ❑ Share specific examples of health-related citizen science projects
- ❑ Discuss some of the challenges associated with citizen science
- ❑ Explain ways librarians & libraries can get involved with citizen science
- ❑ Identify citizen science resources and funding opportunities

What Do Birds Eat?

# Drug discovery from your soil

Presented By: University of Oklahoma

Goal: Natural Product Drug Discovery from soil fungi

Task: Send us soil from your backyard

Where: Drug discovery from your soil

Description: Creating a new medicine is a team effort involving scientist and medical professionals from a wide variety of fields. In 2010, researchers with the University of Oklahoma's Natural Products Discovery Group redefined the notion of what "team" meant when they launched their popular Citizen Science Soil Collection Program. Through this program, volunteers from across the United States have helped by donating soil samples from their own backyards, which OU investigators are using to obtain fungi that make special compounds known as natural products. Natural products are the source of many lifesaving drugs that are used today by doctors around the world.

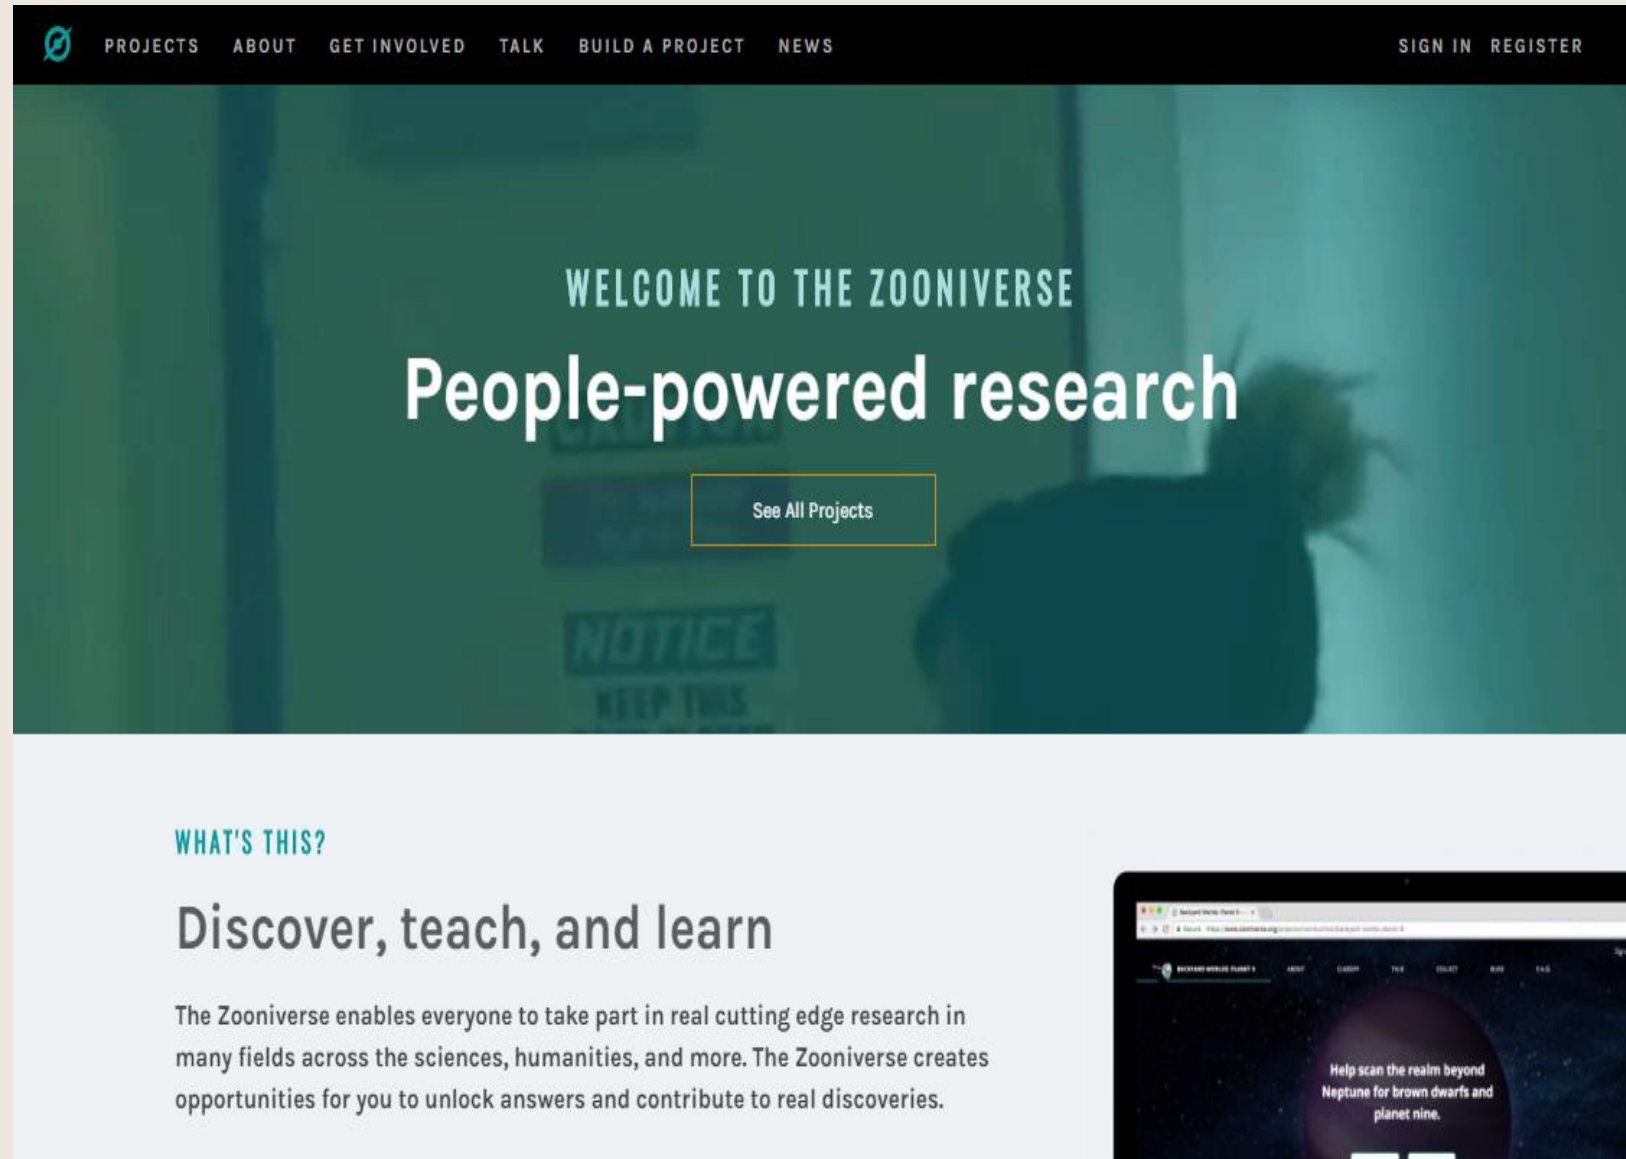

[Read less](#)

How to Join: Joining the research process is amazingly simple: send us your dirt! Visit our website (<http://npdgcitizenscience.org>) and fill out the online form to request a free soil sample collection kit.

How to Join:	<p>Joining the research process is amazingly simple: send us your dirt! Visit our website (<a href="http://npdgcitizenscience.org">http://npdgcitizenscience.org</a>) and fill out the online form to request a free soil sample collection kit.</p> <p>Bonus a free coloring book for our young (6 and under) participants.</p>
Website:	<a href="http://npdgcitizenscience.org">http://npdgcitizenscience.org</a>
Required Gear:	Free soil sample collection kit provided by the project organizer. Participants must own or have permission to collect a sample from the land.
Ideal Age Group:	Elementary school (6 – 10 years), Middle school (11 – 13 years), High school (14 – 17 years), College, Graduate students, Adults, Families

### About ChemIDplus

#### What is ChemIDplus?

Chemical database is a dictionary of over 400,000 chemicals (names, synonyms, and structures). ChemIDplus includes links to NLM and other databases and resources, including links to federal, state and international agencies. [ChemIDplus Lite](#) is designed for simple searching on name or registry. [ChemIDplus Advanced](#) helps users draw their own structures and perform similarity and substructure searches.

**Updates:** ChemIDplus records are updated daily.

#### How do I lease/license the TOXNET databases?

The following TOXNET databases are available for lease: ChemIDplus, DIRLINE, CCRIS, GENE-TOX, HSDB, and TOXLINE.

For further information visit [Leasing Data](#) from the National Library of Medicine.

Warnings: Hazard Statements

Warning. Causes eye irritation.

Precautionary Statements

Prevention

Read label before use. Keep out of reach of children. If medical advice is needed, have product container or label at hand. Wash hands thoroughly after handling.

Response

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical attention.
